Summer Sessions
Course Marketing
Print Catalog
(International Students)

- Submit courses by 10/8/2010 for inclusion in Preview
- Catalogs mailed to international partners, advisors, etc.
- Dynamic preview on website
- OSOC live in December
Course Web re-branded as “Summer Course”

- Students need information before they enroll
- Give instructors access (hired and linked to the course) as soon as possible
- Syllabus, extended course description by December
Summer Course – how to populate by early December??

- Assign departmental delegate(s), who are given access to Summer Course (will send out call for list)
- Delegates can update syllabi, extended course descriptions
  - MSO’s send email to their instructors asking for material (could be this year’s) to give to delegates?
  - Other ideas?
Instructions: Fall 2010

PLEASE READ CAREFULLY ALL THE PARAGRAPHS BELOW THAT APPLY TO ENGLISH COURSES IN WHICH YOU WANT TO ENROLL. SOME COURSES HAVE LIMITED ENROLLMENT AND/OR HAVE EARLY APPLICATION PROCEDURES.

ALL ENGLISH COURSES: Some courses are in such high demand that they will end up having wait lists on Tele-BEARS. If you end up having to put yourself on one for an English course, please log on to Info-BEARS (http://info.bears.berkeley.edu) to check your advancing status on the wait list.

ENGLISH R1A AND R1B: Note that the book lists and course descriptions for individual sections of English R1A and R1B will be posted on the web and also on the SOUTHERN-most bulletin board in the hall across from the English Department office (322 Wheeler Hall) as of Friday, April 9.

THE PETER AND MEGAN CHERNIN MENTORSHIP PROGRAM (1 unit)

The English Department is pleased to announce a new program that will build stronger and more informal connections among undergraduates, graduate students and faculty. Three faculty members and six graduate students will hold regular gatherings throughout the semester with small groups of undergraduate majors and undeclared students interested in the study of literature.

These meetings will provide opportunities for open and flexible discussions of a host of intellectual, institutional, and practical issues and questions. The specific content of the discussions will be determined by the ideas and needs of particular students or groups of students. Who should I talk to about American poetry, the Victorian novel, or Renaissance drama? What is the difference between a senior thesis and an honors thesis? Why do people go to...
The Department of Astronomy offers undergraduate and graduate instruction in a wide variety of fields, including theoretical and observational astrophysics, infrared, optical, and radio astronomy, galactic structure and dynamics of stellar systems, high-energy astrophysics and cosmology, and spectroscopy. A considerable amount of research and teaching related to astronomy is done in other units at Berkeley, including the Space Science Laboratory, Lawrence Berkeley Laboratory, and the Physics Department. Various professors in the Chemistry, Earth and Planetary Science, Mathematics, Statistics, and Engineering departments have an active interest in astronomy and are available for consultation.

A variety of instruments is available to students and staff, including a 30-inch telescope at Lick Observatory (near the campus), two 10-meter telescopes at the Keck Observatory on Mauna Kea in Hawaii, 30-inch, 40-inch, and 120-inch telescopes at Lick Observatory, a 16-element millimeter-wave interferometer in Southern California, and the Allen Telescope Array at the Hat Creek Radio Observatory. Laboratories are available for the development of radio, infrared, and optical instruments, and for the precise measurement of images and spectra.

Current postdoc opportunities at Berkeley are described here.

Famous planet hunter Geoff Marcy and pioneering geophysicist Burkhard Militzer will team up to teach an innovative on-line class: “The Planets.” Sign up now with the Berkeley Summer Session! Enrollment deadline is Monday June 14, 2010.
